TH WHITE DAIRY

DairyDigest.

thwhitedairy.co.uk

We know it's early, but welcome to the Christmas edition of your favourite trade update.

In this issue we have a bumper dive into the technology and tools available on this year's FETF grant, from slurry separators to weigh scales.

We also have workwear for all ages, clothing to survive winter in and some fantastic Christmas gifts.

Everything featured in this issue of the Dairy Digest and much, much more is available with free delivery on the TH WHITE van. Just let your mobile shop salesperson know if you'd like to order anything and they'll sort everything else.

Please order before the end of November for Christmas delivery.

Happy Christmas!

A snowy day at Hamra Farm, DeLaval Headquarters

FETF 2025: Over 8,800 applicants offered grant funding.

Defra have now confirmed that over 8,800 applicants have successfully secured funding through this year's Farming Equipment and Technology Fund (FETF).

Grant Funding Agreements (GFAs) have been sent to the successful applicants. Together, the successful offers are worth more than £68.4 million.

This funding will help thousands of farmers, horticulturalists, forestry owners and associated contractors invest in new machinery – from autonomous robots that plant seeds with precision to slurry separator systems that reduce both waste and costs.

Next steps for successful applicants.

Defra encourages successful applicants to read their agreements carefully to make sure they understand the terms, conditions, and claim deadline, which is midday on 31 March 2026.

Follow the link in your Defra email to accept or decline the offer before the deadline.

The Rural Payments Agency (RPA) is available to help with any questions.

How T H WHITE can help.

We have grant applicable items in-stock and ready for delivery and fitting.

We can also guide you through the detail of grant applicable items to ensure you get the most from your grant.

We look forward to supporting you to maximise the positive impact of the FETF grant on your business.

FETF GRANT SPECIAL

FETF Grant – DeLaval OptiDuo™ Robotic Feed Pusher

Don't push feed, remix it with DeLaval OptiDuo™, our most advanced feed robot.

Instead of compressing feed, the robot remixes it – making it much more appetising. Ideal for farms operating a once-per-day feeding frequency.

- **Dual-action: repositioning and refreshing feed automatically**
- **Able to move big amounts of feed**
- **Operates safely**

Improves productivity

Moving feed back onto the table makes it more accessible to cows, but doesn't mean they will eat it.

Optiduo™ remixes feed and repositions it avoiding compaction; which means higher consumption and more milk.

- **More frequent and higher feed intake**
- **More milk**
- **24/7 feed availability**

Increased work efficiency

Pushing feed is a time consuming task. So it's a job that gets skipped when things get busy. The OptiDuo™ robot works 24/7, right on schedule.

- **Saves time**
- **Reduces workload**
- **Adaptive Drive handles different feed types and volumes.**

Improved animal welfare

OptiDuo™ remixes feed and repositions it evenly along the table. This leads to an even distribution of feed, which means less stress for low ranked animals.

- **Cows visit the feeding table more often**
- **Better cow traffic**
- **Less competition at the feeding table**

FETF Grant – DeLaval Variable Speed Pumps

We have a selection of grant applicable DeLaval pumps which can actively monitor vacuum demand and change the motor's speed accordingly, ensuring efficiency during both milking and washing cycles. This system helps improve cow comfort and can potentially reduce milking time.

The DeLaval variable speed drive is the first in the dairy industry with a whisper-silent variable speed drive for vacuum pump – addressing the source of the EMC problem rather than the symptoms.

Further Benefits

- **Energy savings:** Reduces energy consumption by up to 65% compared to conventional pumps.
- **Stable vacuum:** Automatically adjusts speed to maintain a consistent and accurate vacuum level, which is crucial for efficient and effective milking.
- **Extended pump life:** By not running at maximum speed all the time, the components experience less wear and tear.
- **Reduced noise:** Variable speed technology helps make the system quieter.
- **Increased efficiency:** Can help speed up milking operations and increase comfort for both cows and workers.

FETF Grant – Cow Brushes

There's a reason more than 100,000 DeLaval Swinging Brushes are keeping farmers around the world happy – because their herd is happy too.

After 18 years of refinement, DeLaval cow brushes reach more parts of a cow's body than any others on the market.

This keeps your cows happy. And when you see a healthier herd, with better herd behaviors, productivity and welfare, we think you'll be happy too.

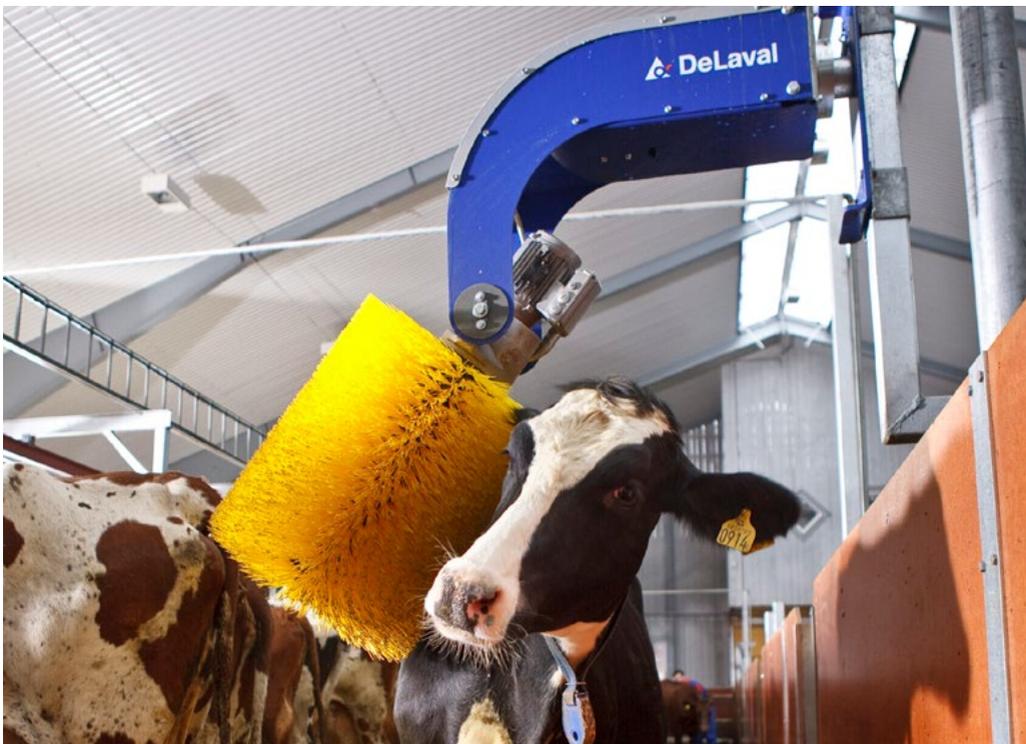

- **Improves herd performance**
- **Keeps cows calm and clean**
- **Patented dual-pivot motion**
- **Automatic safety features**
- **Proven performance with over 100,000 sold globally**

Improves herd performance

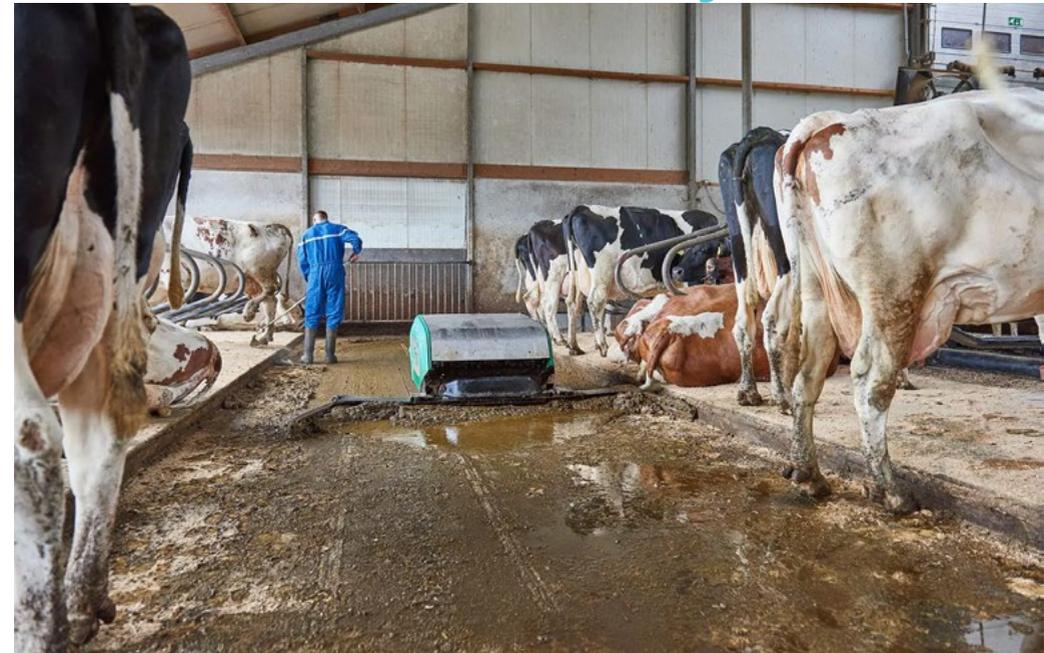

Studies have proven that comfortable and happy cows produce more milk. DeLaval Swinging Cow Brushes enhance natural grooming behaviours and help to improve hide health, blood circulation, cooling in the summer and are proven to reduce cases of clinical mastitis.

Keeps cows calm and clean

Installing a Swinging Cow Brush is proven to reduce cases of mastitis, and remove ticks and other parasites, helping you to lower your veterinary costs.

FETF Grant – Joz Slurry Collector

As a dairy farmer, you certainly want to make the time spent cleaning out your barn as efficient as possible.

If you have an element floor, rubber floor, or another type of solid floor in your barn, you might feel there isn't a robotic option to clean your barn. But if you want to clean your barn floor automatically, we have a great solution:

The Joz Barn-E PRO cleans solid and slatted floors effortlessly. Waiting areas and wide manure alleys also pose no problem for this manure robot. The great thing is: the Barn-E PRO does not push manure forward but collects it. Manure is gathered using a push/slide bar. It is then lifted by a rotating intake and stored in the manure container. The robot then drives to the discharge point and empties the collected manure there.

This animal-friendly manure robot from JOZ automatically cleans your manure alleys at the times you choose.

The robot uses transponder technology, meaning that you can program an unlimited number of routes, allows you to focus on other important responsibilities.

SUITABLE FOR ANY BARN

The JOZ-Tech manure robot is suitable for virtually any cubicle size. It also cleans waiting areas and wider manure alleys effortlessly.

This manure robot is also developed and highly suitable for barns with solid floors.

FETF Grant – DeLaval Calf Coat – now even better

Choose a DeLaval calf coat to keep calves warm and healthy, as they are vulnerable to cold and struggle to regulate their body temperature in the first few weeks of life.

Coats prevent energy loss from heat, improving growth and feed conversion, while also reducing the risk of diseases like pneumonia and scours caused by cold stress and drafts.

Especially beneficial for newborn calves housed in a chilly barn or treating sick calves or small calves born prematurely; but will enhance the growth and performance of all calves.

These updated coats come with buckles and have two sizes available.

- **210 Denier highly water repellent nylon polyester**
- **Urethane 4mm thickness provides excellent insulation**
- **Maximum comfort and highly breathable polyester fleece**
- **On the right side is a pocket that can be used for additional wamers**

Invest in your herd with DeLaval Calf Coats to keep the warmth around your new-born calves.

Two sizes available from £42.28 plus VAT Part No AL-88267302

Bauer Pumps & Separators

High throughput as well as optimal dry matter contents are the distinguishing features of BAUER pumps and separators.

BAUER manufactures equipment for the slurry chain from start to end, from mixing and pumping, to separating, transporting and distributing in the field. Bauer create efficient, high-quality solutions for the entire slurry circuit. Because in their view – Liquid manure is gold.

We have a full range of pumps and separators and can propose the right solution for your farm, taking into account and supporting your FETF grant allocation.

Many years of experience, technically perfect design and the use of the highest quality materials allow the longest possible service life and make BAUER the technology leader in this sector, producing quality slurry management systems in line with ISO 9001.

Gallagher's FETF Grant eligible tools support weighing & animal ID.

Weighing & Identification

You can't manage what you don't measure

Weighing of animals is an essential component for better decision making on a livestock farm and Gallagher have a full range of FETF Grant eligible tools to support accurate weighing and animal identification.

Benefits of accurate weighing & EID

- **Better control of feed costs**
- **More accurate use of medication**
- **Early detection of diseases**
- **Ability to make accurate management decisions**
- **Steering for better business results**
- **Essential Items**

Wireless Loadbar set 2500kg – 1000mm

- 2500kg weighing capacity
- 1000mm steel loadbars
- Slotted top mounting holes fit all sizes of platforms and cages
- 6m long, tough polyurethane loadbar cables
- Fully water resistant

Wireless Loadbar set 2500kg – 600mm

- 2500kg weighing capacity
- 1000mm steel loadbars
- Slotted top mounting holes fit all sizes of platforms and cages
- 6m long, tough polyurethane loadbar cables
- Fully water resistant

Weigh scale W1

- Suitable for permanent or temporary installation
- Quick, easy, and wireless weighing

TW-1 Weigh Scale

- Easy to use touch screen
- Sort into 9 groups
- Compatible with the G.A.P. app
- Tough, farm ready exterior

TW-3 Weigh Scale and Data Collector

- Easy to use touch screen
- Sort into 9 groups and 3 traits
- Compatible with the G.A.P. app
- Tough, farm ready exterior

SmartReader HR4

- Half duplex (HDX) and full duplex (FDX-B) ISO compliant
- Market leading ergonomic design
- Internal memory for over 100,000 tags for later download to computer
- A single vibration is felt in the handle with every successful EID tag read
- Compatible with Gallagher SmartScale

SmartReader HR5

- Large easy to read 2.8" backlit colour display screen
- Internal memory for over 100,000 tags for later download to computer
- A single vibration is felt in the handle with every successful EID tag read
- Compatible with Gallagher SmartScale
- Suitable for permanent or temporary installation
- Quick, easy, and wireless weighing

NEW HOLLAND

T H WHITE EXPANDS NEW HOLLAND TERRITORY

T H WHITE Expands New Holland Territory into Shropshire & Powys

T H WHITE Agriculture is pleased to announce a significant expansion of its partnership with New Holland, extending its dealership territory into the counties of Shropshire and Powys.

This move grows T H WHITE’s footprint and commitment to customers across the West of England, West Midlands and Wales, building on the dependable service that has defined T H WHITE for 193 years.

To strengthen this offering, T H WHITE plans to open new depots in the region,

maintaining reliable after-sales care and parts availability. The company is also exploring complementary premium franchises to broaden its machinery range on offer to farming businesses across Shropshire and Powys.

It is the intention that Graham Probert will lead the dealership business at Knighton, which provides continuity for this important area. The plans for the northern part of the new territory will be announced in due course. “This expansion is a key milestone for us,” said Adrian Lovegrove, Division Director at T H WHITE. “It reflects our ongoing commitment to UK agriculture and our promise to deliver the highest levels of service, technology and product support.

Farmers across Shropshire and Powys can expect the same trusted advice, expert engineering, and dedicated customer care that T H WHITE is renowned for – all within easy reach.” David Rapkins, UK & Ireland Business Director at CNH, added, “We’re delighted to expand our partnership with T H WHITE. Their customer-first philosophy, investment in infrastructure, and strong local relationships make them the ideal choice to represent New Holland in these new territories.

Together, we will continue delivering exceptional value, choice, and service to farmers across this important agricultural region.”

This expansion underscores T H WHITE’s purpose to help its customers thrive by providing industry-leading machinery and standing alongside them with reliable support, season after season.

Powerbank Feature: Can be used as a powerbank to charge other devices, such as your mobile phone.

£30.99 inc VAT **Part No CU-13**

NOW ANYONE CAN OWN A 'BEAST OF BELGIUM'

Or at least a tiny version of it!

Ask your salesperson for more details

New Holland's flagship CR11 combine has been faithfully replicated in this beautifully produced toy by Britains, Europe's oldest scale model maker, a company who have been trading almost as long as T H WHITE!

The CR11 is New Holland's flagship harvesting behemoth launched earlier this year, which has once again broken records for harvesting speed, header size and grain capacity.

We can't guarantee this smaller CR11 will get close to the 140 tonnes per hour that it's big brother glides through, but it comes at a much lower price and it might keep the little (or bigger) ones happy on Christmas morning.

£157.48 inc VAT
Part No BP-43403.

Order before the end of November for free of charge Christmas delivery on your regular T H WHITE van service, or nip into your local T H WHITE store.
